Morton's Celebrated Gold Pens.—Improvements
made in the machinery for making Steel Pens, have enabled them
to cut down the cost of the pens, and made them more valuable in their
production, and able to bring the cost within the reach of all.

The writing pen should know the following facts: Constant
writing for six months is due, when the pen is worn out, and
therefore must be replaced.

Writing pens are now made of Steel Pen. The Gold Pen
remains unchanged by years of use, while the Steel Pen
is ever changing by corrosion and wear; therefore, perfect
uniformity of writing is secured.

Writing pens are always ready and reliable, while the
Steel Pen must be often cleaned and a new one selected
therefore, in the use of the Gold Pen there is great saving of
time. Gold is equal to steel in every respect.

Gold pens are easily attached to the hand of the writer;

therefore, the nerves of the hand and arm are not injured, as is
known to be the case by the use of Steel Pen. He is now selling
Gold Pens at prices far below those of Steel Pens.
